II International Conference on Rare Cardiovascular Diseases

16 – 17 October 2014, Krakow, Poland

Venue:
John Paul II Hospital in Krakow

Organizer:
Centre for Rare Cardiovascular Diseases
at John Paul II Hospital in Krakow
Day 1.

**Session 1**
**Diagnosis and treatment of complex coronary anomalies**
11.00-12.30

- Surgical approach to the treatment of congenital coronary anomalies 20'
- Cardiac and coronary imaging in assessment of coronary artery and heart disease 20'
- Interventional treatment of congenital coronary anomalies 20'
- Regenerative therapy for coronary artery disease 20'
- Discussion 10'

**Session 2**
**Acute states in Rare Cardiovascular Diseases**
13.00-14.15

- Electrical storm in Brugada syndrome or ECG - warning signs 15'
- Primary prevention of sudden cardiac death 15'
- Idiopathic giant cell myocarditis 15'
- Acute dissection of the aorta in patient with Marfan Syndrome 15'
- Discussion 15'

**Session 3**
**Opening ceremony**
15.00-16.30

**Session 4**
**Oral abstract session (original contribution and case reports)**
16.45-18.45
Day 2

Session 5
Heart failure in rare congenital heart disease
9.00-10:30

- Patophysiology of heart failure in patients with congenital heart disease 20'
- Interventional treatment of heart failure in congenital heart disease, ventricular assist devices 20'
- Heart transplantation in patients with congenital heart disease 20'
- Case presentation 15'
- Discussion 15'

Session 6
Current approach to myocarditis
10:45-12:25

- Curing heart failure 20'
- State-of-the-art approach to myocarditis 20'
- Rheumatic heart disease 20'
- The prophylaxis of sudden cardiac death in hypertrophic cardiomyopathy 20'
- Various faces of dilated cardiomyopathy. Lessons learned from routine use of CRCD diagnostic algorithm in dilated cardiomyopathy. 20'

Session 7
Rare cardiovascular diseases in pregnant women
12:30-14.10

- Surgery in pregnant women with cardiovascular diseases 20'
- Percutaneous mitral valvuloplasty in pregnant women (patients) with severe mitral stenosis 20'
- Electrocardiologic interventions in pregnant women (patients) with severe arrhythmias 20'
- Invasive procedure in mother - obstetrician's point of view 20'
- Percutaneous coronary angioplasty in very early pregnancy - case report 20'
